FOR PRODUCT CARE AND WARRANTY

AS/NZS 2210 Australian /New Zealand Standards EN - ISO 20345 European Standards ASTM F2413 American Standards

COLORS

Lightweight metal free composite

*Note:- The actual height and weight of these boots will vary slightly depending on shoe size and manufacturing variations

SAFETY FEATURES

- Heat Resistant 300oC / 570oF
- Slip Resistant
- **Fuel Oil Resistant**
- **Electrical Hazard**
- H₂0 Resistant
- **Penetration Resistant**
- **Ladder Heel**
- **Recycled Materials**
- **Zip Closure**

Airport friendly

PERFORMANCE SYSTEMS

ADAPT"

Sole unit technology designed to maximise adaption to uneven terrain and reduce injury risks.

decouple GROOVE

Offset flex groove design along the length of the sole to provide flexibility to allow a smooth transition from initial contact to foot flat and improve terrain adaption.

ADAPTruss

Unique ADAPTruss design provides torsional rigidity, which supports midfoot stability on uneven environments throughout the natural walking gait.

XTNODES

Extreme Terrain Nodes extruded side node design increases platform stability

.adder**Heel**

Sole design minimizes slip risk on ladders.

asym**BEVEL**

Heel shaped to match the natural heel strike position during walking to maximise contact area and provide a smooth ride

Hydrodynamic

Sole shape and tread pattern engineered to optimise fluid dispersion beneath the foot to minimize slips

FIT GRID TERRAPRO ZIP 2.0

KEY FEATURES

COMFORT

TECH-LITE COMFORT BUILD: A revolutionary multi-layer comfort system with a 3D molded anatomical insole made from high-performance materials for superior cushioning and support.

POLYURETHANE MIDSOLE: Designed for high rebound and comfort, featuring dedicated zones for extra support around the heel and ball of the foot.

DURABILITY

H2O RESISTANT UPPER: All-leather construction ensures long-lasting protection against water and wear.

DESMA INJECTED MIDSOLE: Eliminating glue means greater longevity and resilience.

ENCASED LEATHER YKK SIDE ZIP PROTECTION: Provides added durability and easy access.

FUNCTIONALITY

ENGINEERED FOR MAXIMUM SUPPORT AND MOBILITY: Built for the toughest conditions, the TerraPro Zip 2.0 delivers top-tier ankle protection with a 180mm high-cut design that enhances lower leg stability and helps reduce fatigue during long, demanding shifts. It's engineered to shield against workplace hazards such as uneven terrain, variable heights, and heavy impacts—without compromising freedom of movement.

Ideal for high-risk sectors like mining, heavy industry, trade and construction, the TerraPro Zip 2.0 is purpose-built for professionals who face extreme environments where ergonomics, ankle support and sure footing are critical to staying safe and performing at their best all day.

SUSTAINABLE MATERIALS: Laces and internal wall linings are crafted from 100% recycled polyester, promoting eco-friendliness.

UNDERFOOT PENETRATION PROTECTION: Features a lightweight, flexible composite layer in the midsole for added safety.

LADDER HEEL DESIGN: Enhances safety for climbing or descending ladders or stairs and navigating rugged terrain.

The Mack TerraPro Zip 2.0 safety boot is designed for those who demand comfort, durability, and functionality in their work boots. Experience the difference today!
