

SHOCK ABSORBING LANYARDS RANGE

Be Safe.. Think

RANGE DESCRIPTION

All B-Safe Shock Absorbing Lanyards are manufactured and tested to AS/NZS1891.1 and are proven to reduce forces in a free fall arrest situation to below 6kN. We have a broad selection of webbed, rope and PVC coated wire lanyards, available in various lengths and different configurations to suit all applications. All B-Safe Lanyards are equipped with heavy duty hardware and are ANSI compliant. They are all **rated to 160kg**.

FEATURES & BENEFITS

ELASTICISED TUBULAR WEBBING - SINGLE & TWIN

- Compact and ideal for general purpose use
- Less excess lanyard reducing the potential to trip, snag or drag
- Provides constant connection (Twin)

WEBBING - SINGLE & TWIN

- Lightweight and ideal for general purpose use
- Provides constant connection (Twin)

WIRE ROPE PVC COATED - SINGLE & TWIN

- Suited to hot works environments
- Ideal for general purpose use or in rough conditions
- Ideal solution when working near sharp edges
- Provides constant connection (Twin)

KERNMANTLE ROPE LANYARD - SINGLE & TWIN

- Lightweight
- Kernmantle rope is both flexible and provides greater abrasion resistance
- Provides constant connection (Twin)

ADJUSTABLE WEBBING LANYARD - SINGLE & TWIN

- Lightweight and adjustable for varied heights
- Ideal for general purpose use

HERACRON META ARAMID FIRE RESISTANT WEBBING

- Designed for use in applications where hot sparks or molten materials are present
- Lightweight
- Ideal solution when working near sharp edges
- Suitable for welding, grinding and harsh environments

STANDARDS

- All B-Safe lanyards comply to AS/NZS 1891.
